The Vatican Observatory uses its telescope to search for Extraterrestrial life. In response to this search, the astronomers and even the Pope have expressed opinions on what it would mean to discover Extraterrestrial Intelligence.

Following the presentation, join us at the William Miller Sperry Observatory for refreshments and the chance to look through two of the largest amateur telescopes in the North East (weather permitting).

Sperry Observatory is open to the public every Friday evening, clear or cloudy, between 7:30 and 10:30 pm for an informal talk and observing. AAI has been bringing the night sky to the public for 75 years.
