The South Pole is one of the most inhospitable environments on Earth. The location presents unique challenges to living and doing scientific research. But the great rewards are the one-of-a-kind scientific opportunities and beautiful auroras.

Following the presentation, join us at the William Miller Sperry Observatory for refreshments and the chance to look through two of the largest amateur telescopes in the North East (weather permitting).

Sperry Observatory is open to the public every Friday evening, clear or cloudy, between 7:30 and 10:30 pm for an informal talk and observing. AAI has been bringing the night sky to the public for 75 years.
