The Dragonfly Mission

Joey Pasterski
NASA/Goddard Space Flight Center

Titan is the only moon in the Solar System with a thick atmosphere and surface liquid which resembles early Earth. Scheduled for 2028, NASA's Dragonfly Mission will explore Titan with a drone. Learn about Dragonfly from a member of its scientific team.

Following the presentation, join us at the William Miller Sperry Observatory for refreshments and the chance to look through two of the largest amateur telescopes in the North East (weather permitting).

Sperry Observatory is open to the public every Friday evening, clear or cloudy, between 7:30 and 10:30 pm for an informal talk and observing.

AAI has been bringing the night sky to the public for 75 years.

WHEN

October 17, 2025
9:00 pm

WHERE

Roy Smith Theater
Cranford Campus
UCNJ
1033 Springfield Ave.
