With the discovery of subsurface oceans in some of the Solar System's outer moons there are many more places to search for habitable environments. The Europa Clipper mission is the first to explore these oceans and determine if they are indeed habitable.

Following the presentation, join us at the William Miller Sperry Observatory for refreshments and the chance to look through two of the largest amateur telescopes in the North East (weather permitting).

Sperry Observatory is open to the public every Friday evening, clear or cloudy, between 7:30 and 10:30 pm for an informal talk and observing. AAI has been bringing the night sky to the public for 75 years.
